## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because of the legal term "means" on line 11. Correction is required. See MPEP § 608.01(b).

### ***Claim Re-numbering***

The newly added claims 1-11 have been renumbered as claims 11-21, respectively according to rule 1.126.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, there is a lack of antecedent basis for the limitation "the turbine housing" on lines 25 and 28 of the claim.

In addition, lines 24-28 of claim 11 recites the limitations "wherein the central opening (53) or a central outlet pipe (10) of the turbine housing (2) is insertable into a sleeve (45) such that the sleeve (45) is insertable into said central opening (53) for fixing the guiding grid in the turbine housing (2) inclusive of the guiding grid in its central outlet (10)". It is unclear as to how

Art Unit: 3745

the central opening is insertable into a sleeve and then, the sleeve is inserted into the central opening.

Claims 2-18 are indefinite as being dependent on claim 1.

Claim 19 is indefinite because it is unclear whether "fixing means" on lines 34 and 40 are the same or not. Furthermore, it is unclear "the axial position relative to the housing" as recited on line 40-41 of the claim refers to the which component.

Claims 20 and 21 are indefinite as being dependent on claim 19.

#### ***Prior Art***

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 1 patent.

Berg (4,657,476) is cited to show a variable area turbine.
